**COMPLAINT:**

01 Oil leaking from right front axle

**CORRECTION:**

Removed right hand front wheel.  
 Found the main hub seal was leaking and both inside seals.  
 Installed MFWD hub seal kit.  
 Cleaned the oil and dirt from the wheel, while it was off.  
 Re-installed the wheel.  
 Test drove the tractor to break in the seals.  
 No leaks.

**COMPLAINT:**

01 SERVICE CALL TO MARK'S PLACE. (JUST HAD IT HERE FOR INSPECTION). THE BLOWER FAN KEEPS GOING AFTER SHUTTING THE KEY SWITCH OFF, BATTERIES DIED. DIAGNOSE AND REPAIR AS NEEDED.

**CORRECTION:**

Drove to the tractor and found the caution light and the transmission light were flashing. The blower motor was running with the key off.

Performed diagnostics and found the issue was the auto steer wiring.

Removed fuse 16 and 17, the lights stayed off and everything work except the auto steer.

Mark brought the tractor to town.

Removed the fuses so the battery would not go dead.

Removed the back cover and unhooked the auto steer controller.

Found a broken connector so replaced it.

Continued diagnostics in the cab.

Inspected and wiggled the wiring for the auto steer monitor on the corner post.

The caution lights went out and stayed off.

Took apart the corner post and removed the tape and covering on the wiring.

Checked the wiring for any bent or broken wires but found nothing.

Taped it back up and put the cover back.

Reassembled the corner post.

Took the tractor out and drove it down the road but it never did act up.

Called customer to come get and try out.

23 miles total

\*Customer not charged for service call mileage.

COMPLAINT:

04) MFWD light does not come on but tractor acts like it's engaged all the time

CORRECTION:

Isolated the cause for the mfwd indicator not working to a burned out light bulb.  
 Installed a new bulb & reassembled.  
 The light operation was normal.  
 Checked out the mfwd and it acts like it is operating correctly.

COMPLAINT:

01 SERVICE CALL. ROCKSHAFT HAS A VERY SLOW RESPONSE TIME. DIAGNOSE AND ADVISE MARK OF NEEDED REPAIRS.

Details:

CORRECTION:

Drove to tractor from another service call in the area. Mark showed me what was going on and he said he had been greasing the lift cylinder pins and it seems to maybe getting better he said. I said we should probably try to calibrate it, he Said he will let us know when to calibrate the hitch. 21 miles.

COMPLAINT:

02 MARK CALLED BACK AND WOULD LIKE TO CALIBRATE THE HITCH NOW.

CORRECTION:

Loaded tools up and went to the tractor, heated the hydraulic oil up and installed weights on the hitch. figured out what size of cylinders I had on the tractor and calibrated the hitch. It was successful, hitch worked good and no codes. Loaded everything back up and came back to the shop. 23 miles.
