

AUGER WAGON

- 156, 206, OR 305 CU. FT. MODELS
- FRONT OR REAR UNLOADING
- HYDRAULIC AUGER POSITIONING

Sudenga Auger Wagons transport finished feed the fast, easy way! Auger Wagons are ideal when it's a long haul from mixing to feeding sites, especially in rough terrain. Also, an Auger Wagon keeps portable mixer/grinders going non-stop.

Unloading times are as little as seven minutes. The discharge auger has hydraulic positioning and 360° rotation. Discharge heights range from 34" for bunk feeders up to 21 ft. for bulk tanks.
