DIAGNOSE TRANSMISSION/DIFFERENTIAL

Customer states wont shift above 13th gear.

Refence W30190 for some previous diagnosis.

Got machine in shop and started running tests. Drained transmission and found e-clip and washer at bottom of screen area. Found the clutch valve wasn't moving with pieces missing. After that repair and had back together, still wouldn't go above 13th gear at all. Started Running pressure checks again on system. Found it had several leaks on different piston packs. Tore back down and pulled the guts out of case to rebuild it but got into it and found drums were worn very bad. That doubled price of the quote. Referred to customer about getting a rebuilt with the time.
