

STALK DESTROYER™

FOR PLANTERS

Currently fits JD 1770 and newer mounted or pull type planters; more makes and models in the works; *patent pending*.

PROBLEM

Tires wear out quickly due to hard stalks in heavy no-till conditions.

SOLUTION

The Stalk Destroyer slams hardy stalks to the ground just prior to the wheel's arrival, saving the tires from early destruction.

You can see where stalks wore off the paint on the planter prior to Stalk Destroyer installation.

BENEFITS OF THE STALK DESTROYER

- ▶ Simple design.
- ▶ Durable & flexible.
- ▶ Extends the life of tires, less flat tires.
- ▶ Keeps stalks from piercing & wearing out tires.
- ▶ Less down time.
- ▶ More cost efficient.
- ▶ Pivot bushing; range of movement & bounce back.
- ▶ Wrapping prevented.

FULL BACK-AND-FORTH MOVEMENT

Its torsion axle allows the Stalk Destroyer full back-and-forth flexibility, stomping down all stalks upon contact without getting hung up in ditches or over terraces.
