COMPLAINT:

repair cab blower fan

### CORRECTION:

Technician Comments: Went on a service call to see why the blower motor in the 4640 was not working. Got out there and turned the key on. Well the fan was turned off so i turned it on and the fan worked. I let the fan run for about a half hour and did not have any problems with it. While i was there i looked at the 4840 and checked the fan in it since both tractors were sitting next to each other. The fan was ok in both tractors. I told them if it quit during the day to give us a call and we would run out and look at it. Came back to the shop and filled out my paper work.

### Gen3- Retail

#### COMPLAINT:

check engine miss/noise?

#### CORRECTION:

##### Technician Comments:

Brought tractor in the shop and cleaned the engine around the injectors. Removed the injectors and teasted them. They were all below spec and two of them were leaking really bad. Ordered all new reman injectors. Test the new injectors befor installing them.

I replaced the gasket on the oil fill cap on the engine it was leaking alot of oil.

Tried to adjust the idle of the engine. The linkage was loose and broke when i tried to adjust it. Ordered both inkages and turnbuckle. Installed the linkage adn adjusted the idle on the engine.

Washed of the engine and installed sheilds. Ran the tractor and checked for leaks. Hooked the stock chopper back up to the tractor.

### Gen3- Retail

#### COMPLAINT:

leak up front, repair lights, change hyd filters, having trouble shifting, cables?

#### CORRECTION:

3281.9 hrs, washed tractor, test drove tractor, there was a broken wire going from the cab to the lights on the front weights, tested the wire for volts, then spliced and put a weather pack connector onto the lights, lights still didn't come on, so I looked at the ground and tried to just ground to the weights, which didn't work, so just put a wire going to the frame for the ground and the lights came on, than hide the wire and put protector on it, two other lights on the tractor were out so I changed them, changed transmission and hydraulic oil filters but not the oil, changed and adjusted park cable, had to remove hood to find leak in front by the oil cooler
